Contract Review

Contract Name	SoulPiece
Compiler Version	v0.8.11+commit.d7f03943
Optimization	200 runs
Licence	MIT
Explorer	https://bscscan.com/token/0x9A0eF5f801930A6Bda5F86F8Bcb79629e93D53F6
Symbol	SOUL
Decimals	18
Total Supply	500,000,000
Source	contract.sol
Domain	cryptocardsnft.me

Audit Updates

Initial Audit	16th January 2022
Corrected	

Contract Analysis

● Critical
 ● Medium
 ● Minor
 ● Pass

Severity	Code	Description
●	ST	Contract Owner is not able to stop or pause transactions
●	OCTD	Contract Owner is not able to transfer tokens from specific address
●	OTUT	Owner Transfer User's Tokens
●	ELFM	Contract Owner is not able to increase fees more than a reasonable percent (25%)
●	ULTW	Contract Owner is not able to increase the amount of liquidity taken by dev wallet more than a reasonable percent
●	MT	Contract Owner is not able to mint new tokens
●	BT	Contract Owner is not able to burn tokens from specific wallet
●	BC	Contract Owner is not able to blacklist wallets from selling

ST - Stop Transactions

Criticality	minor
Location	contract.sol#L625

Description

The contract owner has the authority to stop transactions for all users after their initial transaction. For instance, if a user buys once, he may never be able to sell again. The owner may take advantage of it by setting a high value on the `antiBotSeconds` variable.

```
if (!whitelist[msg.sender]){
    uint secondsPassed = block.timestamp - lastTrade[msg.sender];
    require(secondsPassed >= antiBotSeconds, "AntiBot: You can't trade yet.");
}
```

Recommendation

The contract could embody a check for not allowing setting the `antiBotSeconds` more than a reasonable time period.

The team should carefully manage the private keys of the owner's account. We strongly recommend a powerful security mechanism that will prevent a single user from accessing the contract admin functions. That risk can be prevented by temporarily locking the contract or renouncing ownership.

Contract Diagnostics

● Critical ● Medium ● Minor

Severity	Code	Description
●	L01	Public Function could be Declared External
●	L04	Conformance to Solidity Naming Conventions
●	L09	Dead Code Elimination

L01 - Public Function could be Declared External

Criticality	minor
Location	contract.sol#L421,L402,L374 and 9 more

Description

Public functions that are never called by the contract should be declared external to save gas.

```
decreaseAllowance  
increaseAllowance  
transferFrom  
...
```

Recommendation

Use the external attribute for functions never called from the contract

L04 - Conformance to Solidity Naming Conventions

Criticality

minor

Location

contract.sol#L599,L598

Description

Solidity defines a naming convention that should be followed. Rule exceptions:

- Allow constant variable name/symbol/decimals to be lowercase.
- Allow _ at the beginning of the mixed_case match for private variables and unused parameters.

```
setAntiBotSeconds  
setAntiBotStatus
```

Recommendation

Follow the Solidity naming convention.

<https://docs.soliditylang.org/en/v0.4.25/style-guide.html#naming-conventions>

L09 - Dead Code Elimination

Criticality

minor

Location

contract.sol#L499,L555,L575 and 1 more

Description

Functions that are not used in the contract, and make the code's size bigger.

```
_burn  
_beforeTokenTransfer  
_afterTokenTransfer  
...
```

Recommendation

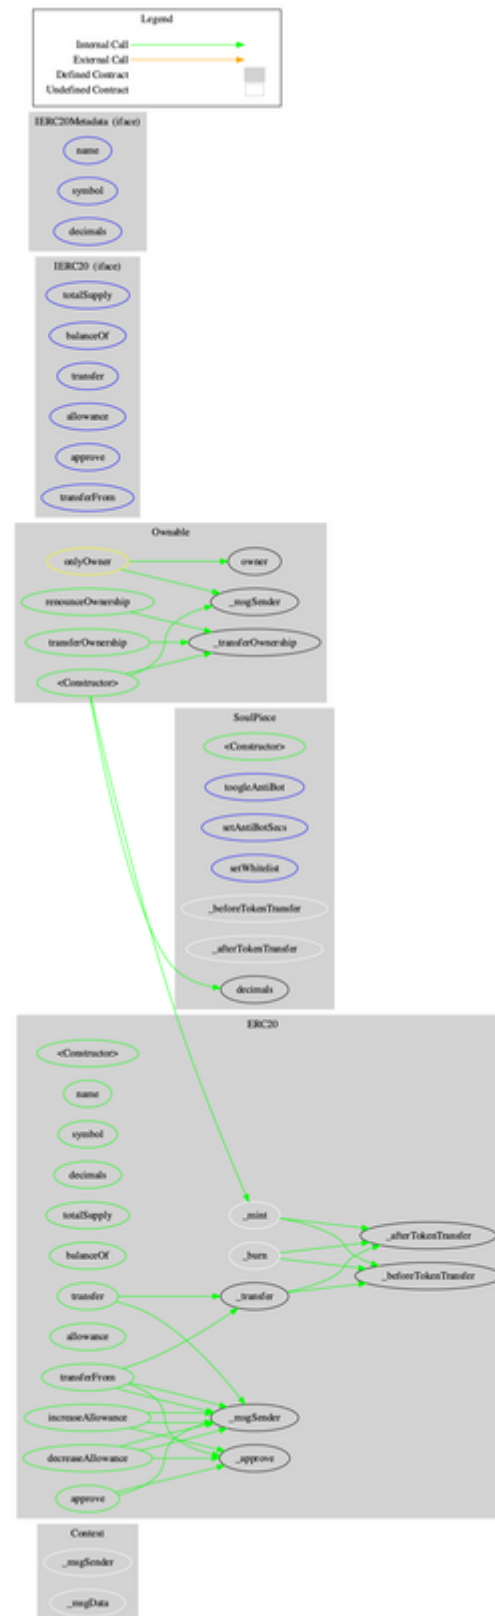

Remove unused functions.

Contract Functions

Summary

Soul Piece is aiming to be a token of crypto cards game. The token has a friendly and growing community. The Smart Contract analysis reported one issue. The owner could prevent the users from performing a second transaction after the initial. A multi-wallet signing pattern will provide security against potential hacks. Temporarily locking the contract or renouncing ownership will eliminate all the contract threats.
