## Contract Review

The contract audit will review the files that are included in the github repository

<b>Github</b>	<a href="https://github.com/Redlight-Node-District/Token-Contract">https://github.com/Redlight-Node-District/Token-Contract</a>
<b>Commit</b>	29ec7e5e6696d8abcbabd40bd0a5a6f8650740ae

The audit review is based on the following files

<b>File</b>	<b>SHA256</b>
Playmate Final.sol	d3770b23b64e614af6db5aa988754ec9d49f9daa22e f8a0506093ecbc4ed28e7

## Audit Updates

<b>Initial Audit</b>	27th January 2022
<b>Corrected</b>	

# Contract Analysis

● Critical
 ● Medium
 ● Minor
 ● Pass

Severity	Code	Description
●	ST	Contract Owner is not able to stop or pause transactions
●	OCTD	Contract Owner is not able to transfer tokens from specific address
●	OTUT	Owner Transfer User's Tokens
●	ELFM	Contract Owner is not able to increase fees more than a reasonable percent (25%)
●	ULTW	Contract Owner is not able to increase the amount of liquidity taken by dev wallet more than a reasonable percent
●	MT	Contract Owner is not able to mint new tokens
●	BT	Contract Owner is not able to burn tokens from specific wallet
●	BC	Contract Owner is not able to blacklist wallets from selling

# Contract Diagnostics

● Critical    ● Medium    ● Minor

Severity	Code	Description
●	L01	Public Function could be Declared External
●	L02	State Variables could be Declared Constant
●	L04	Conformance to Solidity Naming Conventions
●	L07	Missing Events Arithmetic

## L01 - Public Function could be Declared External

<b>Criticality</b>	minor
<b>Location</b>	contract.sol#L428,L392,L385 and 4 more

### Description

Public functions that are never called by the contract should be declared external to save gas.

```
getCirculatingSupply  
setExcludedFromFees  
enableTrading  
...
```

### Recommendation

Use the external attribute for functions never called from the contract

## L02 - State Variables could be Declared Constant

**Criticality**

minor

**Location**

contract.sol#L213,L216,L153 and 1 more

### Description

Constant state variables should be declared constant to save gas.

```
zero  
rewardsPool  
_decimals  
...
```

### Recommendation

Add the constant attribute to state variables that never change.

## L04 - Conformance to Solidity Naming Conventions

**Criticality**

minor

**Location**

contract.sol#L212,L211,L190 and 15 more

### Description

Solidity defines a naming convention that should be followed. Rule exceptions:

- Allow constant variable name/symbol/decimals to be lowercase.
- Allow `_` at the beginning of the `mixed_case` match for private variables and unused parameters.

```
DEAD
WAVAX
_ratios
...
```

### Recommendation

Follow the Solidity naming convention.

<https://docs.soliditylang.org/en/v0.8.9/style-guide.html#naming-conventions>

## L07 - Missing Events Arithmetic

<b>Criticality</b>	minor
<b>Location</b>	contract.sol#L579,L468,L463 and 2 more

### Description

Detected missing events for critical arithmetic parameters. There are functions that have no event emitted, so it is difficult to track off-chain changes.

```
vBuy1 = _vBuy1
_maxWalletSize = (_tTotal * percent) / divisor
_maxTxAmount = (_tTotal * percent) / divisor
...
```

### Recommendation

Emit an event for critical parameter changes.

## Summary

Redlight Token District was formed as a cryptocurrency promotional/discussion group on Telegram. The smart contract analysis reported no compiler errors or critical issues. There are some functions that can be called by the owner but there are limitations to what he can change. There is no malicious function that can interrupt the users' transactions.
