Contract Review

Contract Name	Chameleon
Compiler Version	v0.8.11+commit.d7f03943
Optimization	200 runs
Licence	None
Explorer	https://bscscan.com/token/0xBB34a1F084b62579a9e947C59C3eFe12BC7a1591
Symbol	CAMO
Decimals	9
Total Supply	1,000,000,000
Source	contract.sol
Domain	chameleontoken.app

Audit Updates

Initial Audit	4th February 2022
Corrected	

Contract Analysis

● Critical
 ● Medium
 ● Minor
 ● Pass

Severity	Code	Description
●	ST	Contract Owner is not able to stop or pause transactions
●	OCTD	Contract Owner is not able to transfer tokens from specific address
●	OTUT	Owner Transfer User's Tokens
●	ELFM	Contract Owner is not able to increase fees more than a reasonable percent (25%)
●	ULTW	Contract Owner is not able to increase the amount of liquidity taken by dev wallet more than a reasonable percent
●	MT	Contract Owner is not able to mint new tokens
●	BT	Contract Owner is not able to burn tokens from specific wallet
●	BC	Contract Owner is not able to blacklist wallets from selling

Contract Diagnostics

● Critical ● Medium ● Minor

Severity	Code	Description
●	L01	Public Function could be Declared External
●	L02	State Variables could be Declared Constant
●	L04	Conformance to Solidity Naming Conventions
●	L09	Dead Code Elimination
●	L07	Missing Events Arithmetic

L01 - Public Function could be Declared External

Criticality	minor
Location	contract.sol#L1111,L1106,L1095 and 31 more

Description

Public functions that are never called by the contract should be declared external to save gas.

```
recoverTokensFromContract  
recoverETHfromContract  
setBuyBackEnabled  
...
```

Recommendation

Use the external attribute for functions never called from the contract

L02 - State Variables could be Declared Constant

Criticality

minor

Location

contract.sol#L494,L457,L462 and 2 more

Description

Constant state variables should be declared constant to save gas.

```
deadWallet  
_tTotal  
_symbol  
...
```

Recommendation

Add the constant attribute to state variables that never change.

L04 - Conformance to Solidity Naming Conventions

Criticality

minor

Location

contract.sol#L506,L505,L493 and 24 more

Description

Solidity defines a naming convention that should be followed. Rule exceptions:

- Allow constant variable name/symbol/decimals to be lowercase.
- Allow _ at the beginning of the mixed_case match for private variables and unused parameters.

```
_maxBuyAmount  
_maxSaleAmount  
BuyBackWallet  
...
```

Recommendation

Follow the Solidity naming convention.

<https://docs.soliditylang.org/en/v0.4.25/style-guide.html#naming-conventions>

L09 - Dead Code Elimination

Criticality

minor

Location

contract.sol#L63,L59,L74 and 8 more

Description

Functions that are not used in the contract, and make the code's size bigger.

```
mod
_msgData
_beforeTokenTransfer
...
```

Recommendation

Remove unused functions.

L07 - Missing Events Arithmetic

Criticality

minor

Location

contract.sol#L1091,L1041,L1026 and 4 more

Description

Detected missing events for critical arithmetic parameters. There are functions that have no event emitted, so it is difficult to track off-chain changes.

```
buyBackUpperLimit = buyBackLimit * 10 ** 18
maxLimit = amount
_maxBuyAmount = amount
...
```

Recommendation

Emit an event for critical parameter changes.

There is no public billing information, the creator is protected by the privacy settings.

Summary

Chameleon is aiming to bring crowdfunding to the crypto space. The Project has a friendly and growing community. The Smart Contract analysis reported no compiler error or critical issues. The contract Owner can access some admin functions that can not be used in a malicious way to disturb the users' transactions.
