SQUIDZILLA AUDIT

BEP-20 TOKEN

Prepared by: Coinscope team

For Contract Address : 0x0f34f9A83f8c5cf91F64fB2Dbf974CA5DCD1F885

DISCLAIMER

Coinscope team does not guarantees that a project will not remove liquidity, sell off team supply, or any other exit scam strategy.

The information provided on this document by auditing the respective project is only for general information and should NOT be used as a reason to invest in any independent project.

Our goal is to run as many diagnostics we can with the information we have and is publicly available.

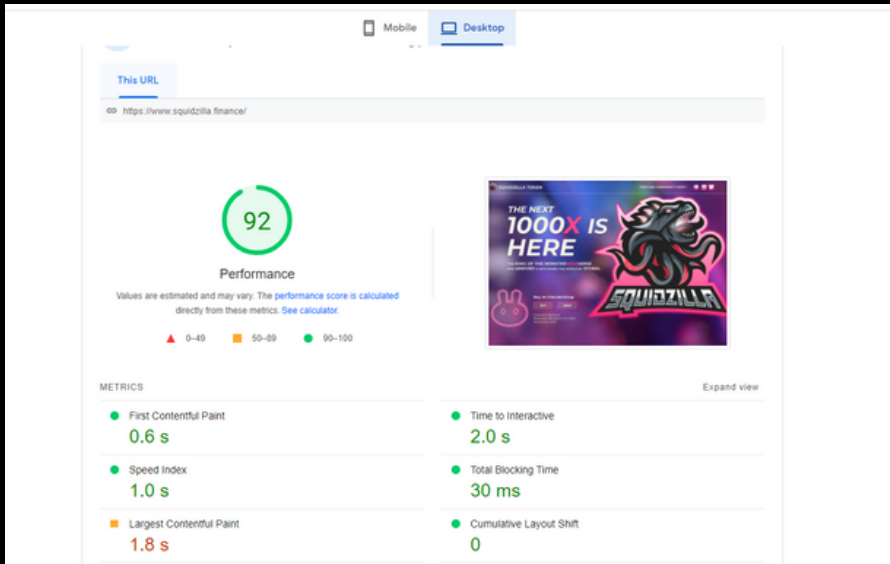

In the end of this audit we will objectively score this project based on the table of contents listed on <https://www.coinscope.co/audit>

Coinscope team under no circumstances will take any bribe or payment for manipulating the results of this audit. We will score and award a security Gem that will stay on this project's information for ever on our website.

Website Report

- Performance
- Best Practices
- Accessibility
- SEO ranking

The only minor issues found are:

- Serve images in next-gen formats. Image formats like WebP and AVIF often provide better compression than PNG or JPEG, which means faster downloads and less data consumption
- Reduce the impact of third-party code.

Roadmap

Roadmap was found on the website and is displayed above. Their plan is to safely launch their token, and boost their marketing efforts in every single step. Their final milestone is game development called MonsterMetaverse.

The roadmap is not overpromising as the only real developed deliverables is their NFT collection and the game development on the end phase. It looks like they team will focus constantly on marketing and promotion.

COINSCOPE

Team & Whitepaper

Team was not found on the website.

This is not a blocker as many project owners will prefer to hide their identities and decide to come forward later.

Whitepaper was found on the website.

According to the "Monster Paper", the project wants to integrate into the Metaverse NFT and gaming ecosystem, inspired by a digital reality where giant Crypto Kaiju (Monsters) fought for dominance over the Metaverse.

Their Tokenomics section explains how fees are accumulated into liquidity, marketing and dev portions, and then used to either increase liquidity or to support the development and marketing of the projects.

Contract & Tech

Contract Owner can stop trades. In that case users can buy without paying for fees but they can **NEVER SELL** their tokens again.

Contract Owner can change fees.

Contract is verified on BSCSCAN.

```
contract SQUIDZILLA is IBEP20, LPSwapSupport, AntiLPSniper {
    using SafeMath for uint256;
    using Address for address;

    struct TokenTracker {
        uint256 liquidity;
        uint256 marketing;
    }

    struct Fees {
        uint256 reflection;
        uint256 liquidity;
        uint256 marketing;
        uint256 divisor;
    }

    Fees public buyFees;
    Fees public sellFees;
    Fees public transferFees;
    TokenTracker public tokenTracker;

    mapping (address => uint256) private _rOwned;
    mapping (address => uint256) private _tOwned;
    mapping (address => mapping (address => uint256)) private _allowances;
    mapping (address => bool) public _isExcludedFromFee;

    uint256 private constant MAX = ~uint256(0);
    uint256 private _tTotal = 55 * 10**5 * 10**9;
    uint256 private _rTotal = (MAX - (MAX % _tTotal));
    uint256 private _tFeeTotal;

    string public constant override name = "SQUIDZILLA";
    string public constant override symbol = "SQUIDZILLA";
    uint256 private constant _decimals = 9;
    uint256 public _maxTxAmount;

    address public marketingWallet;

    constructor (address _routerAddress, address _tokenOwner, address _marketing) LPSwapSupport() public payable {
        updateRouterAndPair(_routerAddress);
        _maxTxAmount = _tTotal;

        marketingWallet = _marketing;

        mintTokenSpendAmount = _tTotal.div(10 ** 6);
        _rOwned[_tokenOwner] = _rTotal;
        _isExcludedFromFee[_owner] = true;
    }
}
```

Contract Results

- ✓ Integer Underflow
- ✓ Integer Overflow
- ✓ Parity Multisig Bug
- ✓ Callstack Depth Attack
- ✓ Transaction-Ordering Dependency
- ✓ Timestamp Dependency
- ✓ Re-Entrancy

Domain info

Domain Name: squidzilla.finance

Registry Domain ID: 59d3b70278d84843b0f8cf4df849d583-DONUTS

Registrar WHOIS Server: www.whois.crazydomains.com

Registrar URL: <http://www.crazydomains.com>

Updated Date: 2021-11-24T01:24:16Z

Creation Date: 2021-11-19T01:24:11Z

Registry Expiry Date: 2023-11-19T01:24:11Z

Registrar: Dreamscape Networks International Pte Ltd

Registrar IANA ID: 1291

The domain is bought almost 70 days before the analysis of this audit and is set for renew in the next year. This is a good sign as it indicates it has been planned for long time.

There is a registered company connected to the domain ownership, leading to a physical person if traced back to the hosting provider.

This is a very good sign as most project owners will choose the privacy options to protect themselves in case they early exit or scam their investors.

Award

12

Our Award system

- 0-49 score points award you with Bronze Badge - high risk.
- 50-89 score points award you with Silver Badge - medium/low risk.
- 90-100 score points award you with Gold Badge - low risk.

Your Score

SQUIDZILLA is a medium/low risk project. The smart contract analysis showed dangers and risks regarding functions that the owner can call and prevent the user from safely selling his/her tokens. This functionality is aimed to be used for anti bot measures but will still be available after launch. On the other hand the contract is not a fork/clone and it indicates deep understanding of solidity. The team was not found on the website but the fact that the domain is bought from a Registered company without privacy setting provides some confidence.

Renouncing the contract ownership will eliminate most of the dangers and risks.

Disclaimer

All the content provided in this document are for general information only and should not be used as a financial advice or a reason to buy any investment.

Coinscope team provides no guarantees against the sale of team tokens or the removal of liquidity by the project audited in this document. Always Do your own research and protect yourselves from being scammed.

Coinscope team has audited this project for general information and only expresses their opinion based on similar projects and checks from popular diagnostic tools. Under no circumstances did Coinscope receive a payment to manipulate those results or change the awarding badge that we will be adding in our website.

Always Do your own research and protect yourselves from scams. This document should not be presented as a reason to buy or not buy any particular token.

Coinscope team disclaims any liability for the resulting losses.
