Contract Diagnostics

● Critical ● Medium ● Minor

Severity	Code	Description
●	L01	Public Function could be Declared External
●	L04	Conformance to Solidity Naming Conventions
●	L09	Dead Code Elimination
●	L15	Local Scope Variable Shadowing

L01 - Public Function could be Declared External

Criticality	minor
Location	contract.sol#L336,345,515,541,561,576

Description

Public functions that are never called by the contract should be declared external to save gas.

```
burnFrom  
burn  
decreaseAllowance  
increaseAllowance  
transferOwnership  
renounceOwnership
```

Recommendation

Use the external attribute for functions never called from the contract.

L04 - Conformance to Solidity Naming Conventions

Criticality	minor
Location	contract.sol#L367,368,369

Description

Solidity defines a naming convention that should be followed. Rule exceptions:

- Allow constant variable name/symbol/decimals to be lowercase.
- Allow _ at the beginning of the mixed_case match for private variables and unused parameters.

```
_name  
_symbol  
_decimals
```

Recommendation

Follow the Solidity naming convention.

L09 - Dead Code Elimination

Criticality

minor

Location

contract.sol#L278,199,214,238,253,174

Description

Functions that are not used in the contract, and make the code's size bigger.

```
mul  
mod  
div  
_msgData
```

Recommendation

Remove unused functions.

L15 - Local Scope Variable Shadowing

Criticality

minor

Location

contract.sol#L449,653

Description

There are variables that are defined in the local scope containing the same name from an upper scope.

owner

Recommendation

The local variables should have different names from the upper scoped variables.
