Website Report

- Performance
- Best Practices
- Accessibility
- SEO ranking

The only minor issues found are:

- Image formats like WebP and AVIF often provide better compression than PNG or JPEG, which means faster downloads and less data consumption.
- Resources are blocking the first paint of your page. Consider delivering critical JS/CSS inline and deferring all non-critical JS/styles

Roadmap

Roadmap was found on the website and is displayed above. All milestones are on track so far and they are heading to the next phase of their plan.

Potential dangers for remaining Roadmap targets

- A lot of development milestones, hiring more developers is a must in order to be able to deliver all those products.

Team & Whitepaper

Team section was not found on the website .

This is not a blocker as many projects will prefer to hide their identities and do an AMA or come forward with their real profiles later.

Litepaper was found on the website.

The project focuses on erasing carbon footprints and improving the sustainability of crypto Assets.

Specifically they have stated that they will use the money obtained after public Sale to fund the following locations:

- 1- Mugla, Antalya. (Turkey)
- 2- Vlora, Shkodra. (Albania)
- 3- Kochani. (North Macedonia)

- 50-89 score points award you with Silver Badge - medium/low risk.
- 90-100 score points award you with Gold Badge - low risk.

Your Score

ANITO is a low risk project, with a small and friendly community. The smart contract analysis showed no a few warnings, nothing serious though. The roadmap is very promising, and the team should focus on marketing and growing the development team, as a lot of development-heavy features are planned for next milestones.
