Website Report

- Performance
- Best Practices
- Accessibility
- SEO ranking

The only minor issues found are:

- Reduce initial server response time. Keep the server response time for the main document short because all other requests depend on it.
- Reduce the impact of third-party code. Third-party code can significantly impact load performance. Limit the number of redundant third-party providers and try to load third-party code after your page has primarily finished loading.

Our Award system

- 0-49 score points award you with Bronze Badge - high risk.
- 50-89 score points award you with Silver Badge - medium/low risk.
- 90-100 score points award you with Gold Badge - low risk.

Your Score

MBC is a very low risk project. The smart contract analysis showed no compiler errors and no major threat issues. The Owner can change fees and there are limitations to that (up to 25% total fees). There are BTC rewards to the holders and they need to manually Claim them. The team is doxxed and has KYC certification from Coinscope. That means that the team's info is saved in Coinscope's Database and will be released to the public in case of a crime is committed or an exit scam strategy. Focusing on marketing should be the next step.
