## Audit Updates

<b>Initial Audit</b>	2nd March 2022
<b>Corrected</b>	

# Contract Analysis

● Critical    ● Medium    ● Minor    ● Pass

Severity	Code	Description
●	ST	Contract Owner is not able to stop or pause transactions
●	OCTD	Contract Owner is not able to transfer tokens from specific address
●	OTUT	Owner Transfer User's Tokens
●	ELFM	Contract Owner is not able to increase fees more than a reasonable percent (25%)
●	ULTW	Contract Owner is not able to increase the amount of liquidity taken by dev wallet more than a reasonable percent
●	MT	Contract Owner is not able to mint new tokens
●	BT	Contract Owner is not able to burn tokens from specific wallet
●	BC	Contract Owner is not able to blacklist wallets from selling

# Contract Diagnostics

● Critical    ● Medium    ● Minor

Severity	Code	Description
●	L01	Public Function could be Declared External
●	L02	State Variables could be Declared Constant
●	L04	Conformance to Solidity Naming Conventions
●	L09	Dead Code Elimination

## L01 - Public Function could be Declared External

**Criticality**

minor

**Location**

contract.sol#L456,464,531,535,539,543,547,552,557,561 and 8 more

### Description

Public functions that are never called by the contract should be declared external to save gas.

```
reflectionFromToken  
reflect  
totalFees  
isExcludedFromFee  
isExcluded  
decreaseAllowance  
increaseAllowance  
transferFrom  
approve  
...
```

### Recommendation

Use the external attribute for functions never called from the contract.

## L02 - State Variables could be Declared Constant

**Criticality**

minor

**Location**

contract.sol#L524,509,510,513,512

### Description

Constant state variables should be declared constant to save gas.

```
reflectFeePercentage  
marketFeePercentage  
_symbol  
_name  
_decimals
```

### Recommendation

Add the constant attribute to state variables that never change.

## L04 - Conformance to Solidity Naming Conventions

<b>Criticality</b>	minor
<b>Location</b>	contract.sol#L505,507

### Description

Solidity defines a naming convention that should be followed. Rule exceptions:

- Allow constant variable name/symbol/decimals to be lowercase.
- Allow \_ at the beginning of the mixed\_case match for private variables and unused parameters.

```
marketWallet  
_tTotal
```

### Recommendation

Follow the Solidity naming convention.

<https://docs.soliditylang.org/en/v0.4.25/style-guide.html#naming-conventions>

## L09 - Dead Code Elimination

<b>Criticality</b>	minor
<b>Location</b>	contract.sol#L269,279,298,312,358,368,331,341,220,244 and 4 more

### Description

Functions that are not used in the contract, and make the code's size bigger.

```
mod
_msgData
verifyCallResult
sendValue
isContract
functionStaticCall
functionDelegateCall
functionCallWithValue
functionCall
...
```

### Recommendation

Remove unused functions.

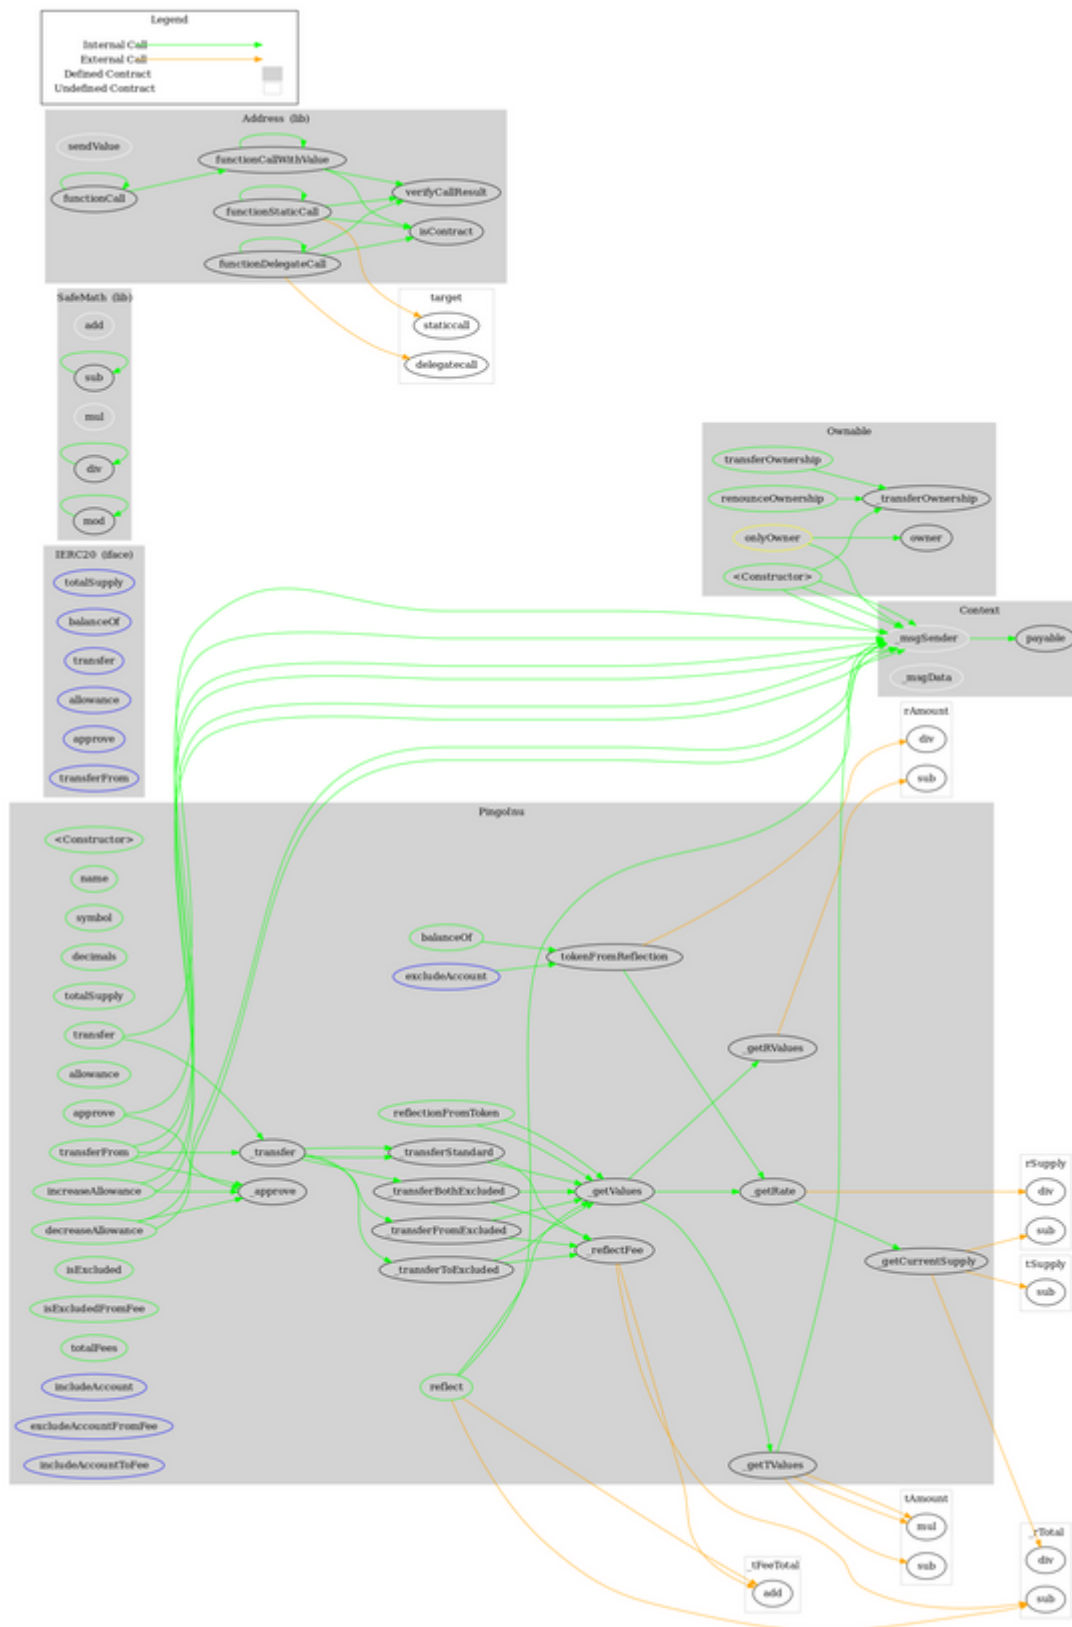

# Contract Functions

Contract	Type	Bases		
	Function Name	Visibility	Mutability	Modifiers
<b>Context</b>	Implementation
