### Description

Solidity defines a naming convention that should be followed. Rule exceptions:

- Allow constant variable name/symbol/decimals to be lowercase.
- Allow \_ at the beginning of the mixed\_case match for private variables and unused parameters.

```
_allowances  
_balances  
_maxWalletSize  
_maxTxAmount  
_totalSupply  
_decimals  
_symbol  
_name  
PANCAKE_ROUTER  
...
```

### Recommendation

Follow the Solidity naming convention.
