# Roadmap

Roadmap was found on the website and is displayed above, all targets on Q1 were completed with success, the team will focus now on listing on centralized exchanges, CMC and also developing their android app and starting their online store. The team should keep in mind that CMC requires a lot of trading volume for getting listed, and the centralized exchanges also have very high fees. the team should gather resources before proceeding with that.

# Team Analysis

Team was found on the website and is shown above.

The profiles displayed have social links with a lot of activity and number of connections, making it most likely they are who they say they are.

That's a very positive indicator as most projects owners will hide their identities. Doxxing the team provides the community with confidence and the feeling that transparency is all around the project.
