# **Contract Review**

Contract Name	BuybackBabyToken
Compiler Version	v0.8.4+commit.c7e474f2
Optimization	200 runs
Licence	MIT
Explorer	https://bscscan.com/token/0x837724f3B1e7Da94016A 323b0Def6FC5273e9E5D
Symbol	FXC
Decimals	9
Total Supply	100,000,000,000
Source	contract.sol
Domain	

# **Audit Updates**

Initial Audit	26th February 2022
Corrected	

# **Contract Analysis**

CriticalMediumMinorPass

Severity	Code	Description
•	ST	Contract Owner is not able to stop or pause transactions
•	OCTD	Contract Owner is not able to transfer tokens from specific address
•	OTUT	Owner Transfer User's Tokens
•	ELFM	Contract Owner is not able to increase fees more than a reasonable percent (25%)
•	ULTW	Contract Owner is not able to increase the amount of liquidity taken by dev wallet more than a reasonable percent
•	MT	Contract Owner is not able to mint new tokens
•	ВТ	Contract Owner is not able to burn tokens from specific wallet
•	ВС	Contract Owner is not able to blacklist wallets from selling

# **Contract Diagnostics**

CriticalMediumMinor

Severity	Code	Description
•	L01	Public Function could be Declared External
•	L04	Conformance to Solidity Naming Conventions
•	L09	Dead Code Elimination
•	L11	Unnecessary Boolean equality
•	L07	Missing Events Arithmetic

# L01 - Public Function could be Declared External

Criticality	minor
Location	contract.sol#L636,643,664,1411

#### Description

Public functions that are never called by the contract should be declared external to save gas.

setFees transferOwnership unauthorize authorize

#### Recommendation

Use the external attribute for functions never called from the contract

# L04 - Conformance to Solidity Naming Conventions

Criticality	minor
Location	contract.sol#L359,749,750,698,1366,1367,1368,1369,1412,1413 and 12 more

#### Description

Solidity defines a naming convention that should be followed. Rule exceptions:

- Allow constant variable name/symbol/decimals to be lowercase.
- Allow \_ at the beginning of the mixed\_case match for private variables and unused parameters.

```
_decimals
_minDistribution
_minPeriod
_denominator
_target
_amount
_enabled
_marketingFeeReceiver
_autoLiquidityReceiver
...
```

#### Recommendation

Follow the Solidity naming convention.

https://docs.soliditylang.org/en/v0.4.25/style-guide.html#naming-conventions

# L09 - Dead Code Elimination

Criticality	minor
Location	contract.sol#L255,273,307,287,192,152,218,23,65,77 and 2 more

#### Description

Functions that are not used in the contract, and make the code's size bigger.

```
tryMul
tryMod
tryDiv
tryAdd
mod
div
predictDeterministicAddress
cloneDeterministic
...
```

#### Recommendation

Remove unused functions.

# L11 - Unnecessary Boolean equality

Criticality	minor
Location	contract.sol#L1011

#### Description

The comparison to boolean constants is redundant. Boolean constants can be used directly and do not need to be compared to true or false.

require(bool,string)(buyBacker[msg.sender] == true,Not a buybacker)

#### Recommendation

Remove the equality to the boolean constant.

# L07 - Missing Events Arithmetic

Criticality	minor
Location	contract.sol#L748,1365,1379,1456,1464

#### Description

Detected missing events for critical arithmetic parameters. There are functions that have no event emitted, so it is difficult to track off-chain changes.

```
targetLiquidity = _target
swapThreshold = _amount
buybackMultiplierNumerator = numerator
autoBuybackCap = _cap
minPeriod = _minPeriod
```

#### Recommendation

Emit an event for critical parameter changes.

# **Contract Flow**

# Summary

The Smart Contract analysis reported no compiler error or critical issues. The contract Owner can access some admin functions that can not be used in a malicious way to disturb the users' transactions. There is also a limit of max 25% fees.

# About Cyberscope

Coinscope audit and K.Y.C. service has been rebranded to Cyberscope.

Coinscope is the leading early coin listing, voting and auditing authority firm. The audit process is analyzing and monitoring many aspects of the project. That way, it gives the community a good sense of security using an informative report and a generic score.

Cyberscope and Coinscope are aiming to make crypto discoverable and efficient globally. They provides all the essential tools to assist users draw their own conclusions.
