## **Contract Review**

Contract Name	Ruberium
Compiler Version	v0.5.16+commit.9c3226ce
Optimization	200 runs
Licence	MIT
Explorer	https://bscscan.com/token/0x42d9c23BEAe2C082bC8 C3B194c5e1565067d9Ec6
Symbol	RUBE
Decimals	18
Total Supply	10,000,000,000
Source	contract.sol
Domain	ruberium.com

# **Audit Updates**

Initial Audit	1st March 2022
Corrected	

# **Contract Analysis**

CriticalMediumMinorPass

Severity	Code	Description
•	ST	Contract Owner is not able to stop or pause transactions
•	OCTD	Contract Owner is not able to transfer tokens from specific address
•	OTUT	Owner Transfer User's Tokens
•	ELFM	Contract Owner is not able to increase fees more than a reasonable percent (25%)
•	ULTW	Contract Owner is not able to increase the amount of liquidity taken by dev wallet more than a reasonable percent
•	MT	Contract Owner is not able to mint new tokens
•	ВТ	Contract Owner is not able to burn tokens from specific wallet
•	ВС	Contract Owner is not able to blacklist wallets from selling

### MT - Mint Tokens

Criticality	critical
Location	contract.sol#L499

### Description

The contract owner has the authority to mint tokens. The owner may take advantage of it by calling the mint function. As a result the contract tokens will be highly inflated.

```
function mint(uint256 amount) public onlyOwner returns (bool) {
   _mint(_msgSender(), amount);
   return true;
}
```

#### Recommendation

The owner should carefully manage the credentials of the owner's account. We advised considering an extra-strong security mechanism that the actions may be quarantined by many users instead of one. The owner could also renounce the contract ownership for a period of time or pass the access to the zero address.

# **Contract Diagnostics**

CriticalMediumMinor

Severity	Code	Description
•	L01	Public Function could be Declared External
•	L04	Conformance to Solidity Naming Conventions
•	L09	Dead Code Elimination

## L01 - Public Function could be Declared External

Criticality	minor
Location	contract.sol#L318,327,467,486,499,584

### Description

Public functions that are never called by the contract should be declared external to save gas.

burn
mint
decreaseAllowance
increaseAllowance
transferOwnership
renounceOwnership

### Recommendation

Use the external attribute for functions never called from the contract.

# L04 - Conformance to Solidity Naming Conventions

Criticality	minor
Location	contract.sol#L584

### Description

Solidity defines a naming convention that should be followed. Rule exceptions:

- Allow constant variable name/symbol/decimals to be lowercase.
- Allow \_ at the beginning of the mixed\_case match for private variables and unused parameters.

\_amount

#### Recommendation

Follow the Solidity naming convention.

https://docs.soliditylang.org/en/v0.4.25/style-guide.html#naming-conventions

## L09 - Dead Code Elimination

Criticality	minor
Location	contract.sol#L115,214,229,249,264,189

## Description

Functions that are not used in the contract, and make the code's size bigger.

```
mul
mod
div
_msgData
```

### Recommendation

Remove unused functions.

## **Contract Functions**

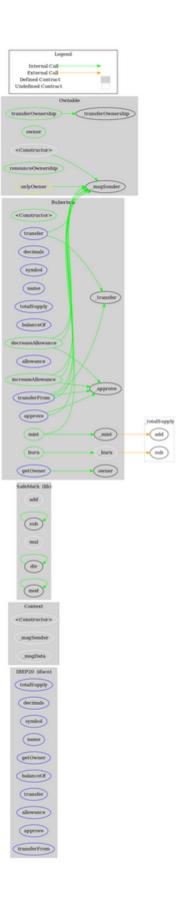

Contract	Туре	Bases		
	Function Name	Visibility	Mutability	Modifiers

## Summary

Ruberium Token is an interesting project with a friendly and growing community. The Smart Contract analysis reported no compiler error and 1 critical issue. There is a mint function that can be abused by the owner. A multi-wallet signing pattern will provide security against potential hacks. Temporarily locking the contract or renouncing ownership will eliminate all the contract threats.

## About Cyberscope

Coinscope audit and K.Y.C. service has been rebranded to Cyberscope.

Coinscope is the leading early coin listing, voting and auditing authority firm. The audit process is analyzing and monitoring many aspects of the project. That way, it gives the community a good sense of security using an informative report and a generic score.

Cyberscope and Coinscope are aiming to make crypto discoverable and efficient globally. They provides all the essential tools to assist users draw their own conclusions.
