Your Score

CYBORG is a medium risk project, with a small community and a very interesting concept. The smart contract analysis showed no warnings, but there are very high fees included on transactions. As explained on their whitepaper this is part of their rewarding tokenomics, punishing the sellers and distributing more rewards to the holders. The team was not found or mentioned anywhere and the whitepaper was not created with attention to detail. Hosting an AMA or doxxing the team is highly advised to provide more confidence and trust to the community.
