Website Report

- Performance ✓
- Best Practices ✓
- Accessibility ✓
- SEO ranking ✓

The only minor issues found are:

- Serve images in next-gen format. Image formats like WebP and AVIF often provide better compression than PNG or JPEG, which means faster downloads and less data consumption
- Properly size images. Serve images that are appropriately-sized to save mobile data and improve load time.

COINSCOPE
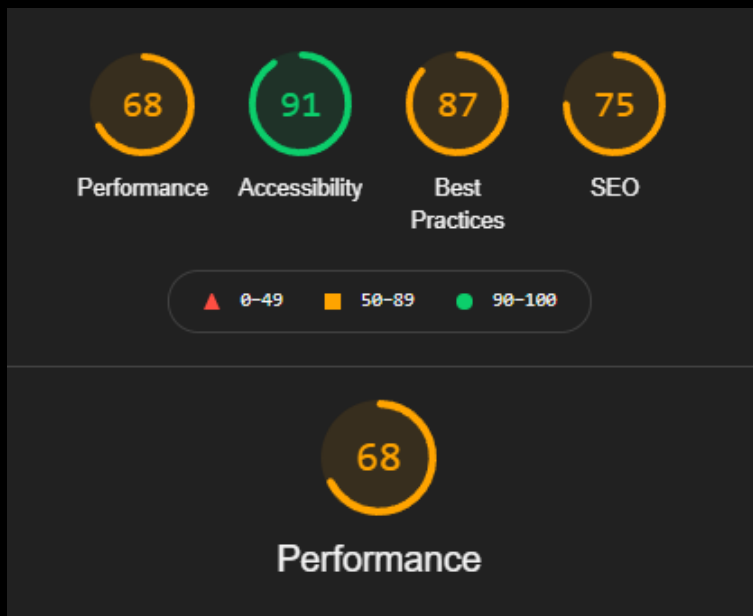

Team & Tokenomics

Team was not found on the website.

This is not a blocker as many project owners will prefer to hide their identities and decide to come forward later.

In the website, Tokenomics are mentioned including fees and reflections, as well as auto generating liquidity protocol. The sell tax is 3% bigger than the buy tax to reward long term holders. Also there is a passive burn fee to create deflation and increase the value of the holders.

Award

Our Award system

- 0-49 score points award you with Bronze Badge - high risk.
- 50-89 score points award you with Silver Badge - medium/low risk.
- 90-100 score points award you with Gold Badge - low risk.

Your Score

74/100

KRYPT is a medium risk project. The smart contract analysis showed 3 major issues. There is an "addSniperList" function that the team can use to blacklist addresses and prevent them from selling, the contract already has an anti-bot mechanism so this manual Owner-only function is a high risk issue. Also the contract Owner can change fees up to any percent without limitations. Finally, every person that buys in the first 30 seconds will be added to blacklist and never be able to sell again unless removed from the sniper list. Renouncing ownership will eliminate all contract threats and issues.
