DISBOT AUDIT

BEP-20 TOKEN

COINSCOPE

Prepared by: Coinscope team
For Contract Address : 0x7Ca72AbFC2B797234b3D8DfD852592f5710Bc6e1

DISCLAIMER

Coinscope team does not guarantees that a project will not remove liquidity, sell off team supply, or any other exit scam strategy.

The information provided on this document by auditing the respective project is only for general information and should NOT be used as a reason to invest in any independent project.

Our goal is to run as many diagnostics we can with the information we have and is publicly available.

In the end of this audit we will objectively score this project based on the table of contents listed on https://www.coinscope.co/audit

Coinscope team under no circumstances will take any bribe or payment for manipulating the results of this audit. We will score and award a security Gem that will stay on this project's information for ever on our website.

Website Report

- Performance ✓
- Best Practices ✓
- Accessibility ✓
- SEO ranking ✓

The only minor issues found are:

- Reduce initial server response time. Keep the server response time for the main document short because all other requests depend on it.
- Reduce unused JavaScript. Reduce unused JavaScript and defer loading scripts until they are required to decrease bytes consumed by network activity.

Roadmap

disbotdatbot roadmap

lewis carol's cheshire cat once said that "if you don't know where you're going, any road will get you there."

cheshire cats are smart like that. we know where we're going. you should come.

phase one
- concept and creation of **disbot**
- website creation
- social media platforms launch
- coding and development of token functions
- prepare for pre-sale
- launch whitelist.

phase two
- launch pre-sale
- get 1,000 tg and discord members
- release first story—press releases on major crypto outlets
- prepare listing on coinmarketcap and coingecko

phase three
- launch public sale
- grow to 2,500 tg and discord members
- grow investor list
- get listed on coinmarketcap and coingecko

Roadmap was found on the website and is displayed above. All milestones are on track so far and they are heading to the next phase of their plan.

Thinks to consider for next milestones:
- Listing on CoinMarketCap requires a lot of trading volume and holders.
- Listing on Coingecko requires a lot of trading volume and holders.

COINSCOPE

Team & Whitepaper

Team was not found on the website.

This is not a blocker as many project owners will prefer to hide their identities and decide to come forward later.

Whitepaper was found on the website.

According to the paper, the theme of the project is a robot built by developers, and holders of the DISBOT token will have a chance to participate (with their fees) into supporting the development community. Fun fact they don't want to use Capital Letters, so all the content in their whitepaper and website are in lower case.

In their Tokenomics section they mention holder reflections, anti-sniping bot functionality and anti-whale mechanism.

COINSCOPE

Contract & Tech

✓ Contract contains anti-bot functionality.

✓ Contract Owner can't change fees. (more than 10%)

✓ Contract is verified on BSCscan.

```
contract AntiBotLiquidityGeneratorToken is IERC20, Ownable, BaseToken {
    using SafeMath for uint256;
    using Address for address;

    uint256 public constant VERSION = 1;

    mapping(address => uint256) private _rOwned;
    mapping(address => uint256) private _tOwned;
    mapping(address => mapping(address => uint256)) private _allowances;

    mapping(address => bool) private _isExcludedFromFee;
    mapping(address => bool) private _isExcluded;
    address[] private _excluded;

    uint256 private constant MAX = ~uint256(0);
    uint256 private _tTotal;
    uint256 private _rTotal;
    uint256 private _tFeeTotal;

    string private _name;
    string private _symbol;
    uint8 private _decimals;

    uint256 public _taxFee;
    uint256 private _previousTaxFee = _taxFee;

    uint256 public _liquidityFee;
    uint256 private _previousLiquidityFee = _liquidityFee;

    uint256 public _charityFee;
    uint256 private _previousCharityFee = _charityFee;

    IUniswapV2Router02 public uniswapV2Router;
    address public uniswapV2Pair;
    address public _charityAddress;

    bool inSwapAndLiquify;
    bool public swapAndLiquifyEnabled;

    uint256 private numTokensSellToAddToLiquidity;

    IPinkAntiBot public pinkAntiBot;
    bool public enableAntiBot;
```

Award

Our Award system

- 0-49 score points award you with Bronze Badge - high risk.
- 50-89 score points award you with Silver Badge - medium/low risk.
- 90-100 score points award you with Gold Badge - low risk.

Your Score

87/100

DISBOT is a medium/low risk project with a small community. The smart contract analysis showed no risks or dangers. The Contract includes an anti-bot mechanism to protect early investors from getting sniped. The owner can change fees but there are limits to protect the holders. The team was not found or mentioned anywhere on the website or Whitepaper.

Hosting an AMA or doxxing the team is highly recommended for next steps, in order to provide confidence and trust to the community.
