Website Report

- Performance ✓
- Best Practices ✓
- Accessibility ✓
- SEO ranking ✓

The only minor issues found are:

- Serve images in next-gen format. Image formats like WebP and AVIF often provide better compression than PNG or JPEG, which means faster downloads and less data consumption
- Eliminate render-blocking resources. Resources are blocking the first paint of your page. Consider delivering critical JS/CSS inline and deferring all non-critical JS/styles

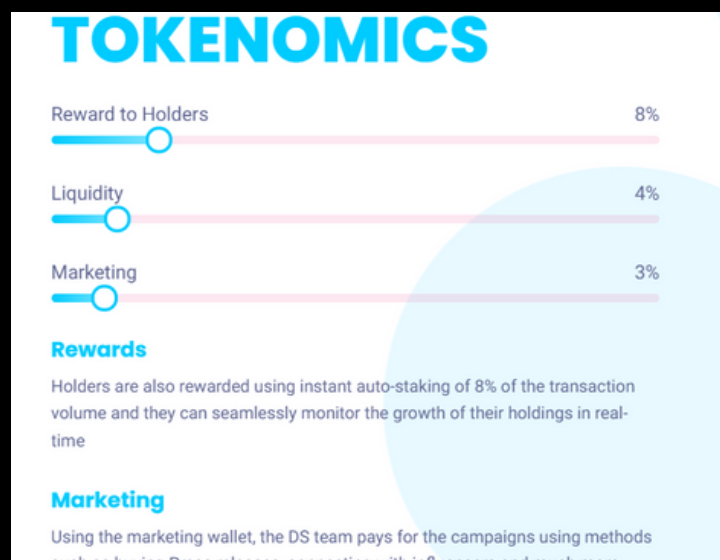

COINSCOPE

Team & Tokenomics

Team was not found on the website.

This is not a blocker as many project owners will prefer to hide their identities and decide to come forward later.

In the website, Tokenomics are mentioned including fees and reflections, as well as auto generating liquidity protocol. However on the contract analysis there is no functionality to support these claims.

Award

Our Award system

- 0-49 score points award you with Bronze Badge - high risk.
- 50-89 score points award you with Silver Badge - medium/low risk.
- 90-100 score points award you with Gold Badge - low risk.

Your Score

49/100

DoctorShiba is a high risk project. The smart contract analysis showed 3 major issues. There is a "pause" function that the team can abuse to manipulate trades and prevent users from selling. The owner can also mint new tokens, inflating the price and decreasing existing user's value. Finally the contract Owner can prevent a single address from selling tokens. The team was not found or mentioned anywhere. The Tokenomics shown in the website suggest there are reflections and rewards to holders but in reality the contract does not support them. Renouncing ownership will eliminate all contract threats and issues.
